

***IN THE UNITED STATES PATENT AND TRADEMARK OFFICE***

Applicant: Masaki NAKANO  
Title: MOTOR/GENERATOR WITH MULTIPLE ROTORS  
Appl. No.: 09/668,348  
Filing Date: 09/25/2000  
Examiner: Thanh Lam  
Art Unit: 2834  
Conf. No.: 1908  
Allowed: 05/07/2003

**COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE**

Commissioner for Patents  
PO Box 1450  
Alexandria, Virginia 22313-1450

ATTENTION: BOX ISSUE FEE

Sir:

The applicant sincerely appreciates allowance of his patent application.

The applicant notes that, as indicated in the Notice of Allowability, 21 different claims have been allowed. Because these claims recite different features and aspects of the invention, the applicant wishes to set forth his understanding of the reasons for allowance with respect to various claims. It is respectfully requested that the Examiner indicate if the applicants' understanding is not correct.

The prior art of record and the cited arts alone or in combination fail to disclose or suggest a motor/generator having a current control device that supplies a composite current comprising the first alternating current and the second alternating current to each of the coils, as set forth in all of the independent claims 1, 4, 6, 9, 10, and 17, and as thus set forth in all of the claims by virtue of their dependency from the independent claims.

The prior art of record and the cited arts alone or in combination fail to disclose or suggest a motor/generator comprising a stator which is accommodated in a case that has a passage of liquid coolant, and is supported inward by the case, as set forth in independent claim 9.

The prior art of record and the cited arts alone or in combination fail to disclose or suggest a motor/generator comprising a stator wherein magnetic reluctance between adjacent core units is set to be greater than a magnetic reluctance between the first core and the second core of the same core unit, as set forth in independent claims 4, 6, 9 and 10, and the dependent claims dependent thereon by virtue of their dependency.

The prior art of record and the cited arts alone or in combination fail to disclose or suggest a motor/generator comprising a first rotation shaft, a first rotor rotating with the first rotation shaft and having a first number of magnetic poles that form a first magnetic field, in combination with the other features set forth in each of the claims.

Respectfully submitted,

Date JUL 30 2003
